### Section II - Conflict of Interest Declaration

The author and the patient group must declare any potential conflicts of interest that may influence or have the appearance of influencing the information submitted. Examples of conflicts of interest include, but are not limited to, financial support from the pharmaceutical industry (*such as educational/research grants, honoraria, gifts, and salary*), as well as affiliations or personal/commercial relationships with drug manufacturers or other interest groups.

### Section III - Impact of the Disease/Condition

What symptoms and problems do patients have as a result of the disease/condition? How does the condition affect day-to-day life? For example, are there activities that patients are not able to do as a result of the condition?

---

**Treatment outcomes that matter most to patients**

What are the most important aspects of the condition that patients would like to see addressed by treatments?

In terms of treatment efficacy and side effects, what are patients getting from the existing treatments and what would patients like new treatments to do differently?

Are there other practical implications to be considered in determining the value of a treatment? For example, how do treatments impact patients' or caregivers' daily routine or lifestyle?

In addition to the drug cost, are there other financial implications to patients or caregivers (*e.g. traveling cost, time away from work, drug disposal issues, drug administration supplies*)?

---

**Information from patients who have used this drug**

*For patients who have used this drug as part of a clinical trial or from a manufacturer's compassionate supply or have purchased it through other means (private insurance or paid out of pocket).*

What positive and negative impacts does the drug have on the condition?

Which symptoms is the drug best or worst at treating (*advantages and disadvantages*)?

What difference does the drug make to patients' long-term health and wellbeing?

What are the side effects of the drug, which ones are patients prepared to put up with, and which ones do they find unacceptable?

How does the drug compared with other available treatments in terms of efficacy, side effects and other practical implications (*e.g. administration, time, costs*)?

---
